EDUCATION

Bachelor of Technology - Computer Science

G.H Raisonni College of Engineering

2021 – 2025

CGPA - 8.8

SKILLS

Technical Skills

Languages: Python, JavaScript, SQL

Gen AI / LLM: LangChain, RAG, Vector Databases, Embedding Models,

Backend: FastAPI, Express.js, RESTful APIs

Databases: MongoDB, PostgreSQL, SQL, Vector DBs

Tools: Git / GitHub, Postman, VS Code, Docker (basic)

Other: React.js, Tailwind CSS, Agile / Scrum

Soft Skills

- Problem-Solving
- Communication
- Leadership

PROJECTS

AskDocs – RAG-based Document Q&A System

- Built a RAG-based document Q&A system that retrieves relevant chunks from uploaded files and generates context-aware answers
- Implemented hybrid retrieval using BM25 keyword search + ChromaDB ONNX embeddings with Reciprocal Rank Fusion.
- Exposed the pipeline as a REST API using FastAPI for front-end integration.
- Achieved accurate multi-page document answers by combining dense retrieval, prompt-engineered context injection, and conversational memory.

CodeLens – AI Codebase Analyzer

- Generated wiki-style architecture docs from any GitHub repository using LLM synthesis
- Built AST parser and dependency graph with topological sort and cycle detection for code structure analysis
- Added interactive chat for asking follow-up questions about analyzed repositories

ThinkFlow — AI Voice-to-Task Assistant

- Developed a full-stack voice-to-task assistant using **React, FastAPI, and PostgreSQL**, integrating SarvamAI for speech-to-text and Cerebras LLM for AI intent classification
- Built **JWT auth** (Supabase), user-scoped task CRUD
- Deployed on **Render** with responsive UI (Tailwind CSS) and real-time voice processing pipeline

EXPERIENCE

Graduate Engineer Trainee

10/2025 – Present

HCLTech (FullTime)

Nagpur

- Resolved frontend bugs and implemented UI enhancements on the OTP Corporation project, reducing open issues by contributing fixes across multiple sprints.
- Collaborated in Agile ceremonies (standups, sprint reviews, retrospectives) across a cross-functional team; managed tasks via Jira and version control via Git.

Trainee (Scholar)

06/2025 – 09/2025

HCLTech

Noida

Gained practical knowledge in Core Java, Spring Boot, and RESTful API development during a 3-month Graduate Engineer Trainee program, including hands-on work with SQL databases and backend application development.

ACHIEVEMENTS

Open Source Contributor

- Contributed to Sugar Labs educational projects through bug fixes and UI improvements
- Worked in a collaborative GitHub workflow (issues, PRs, code reviews)

Merged PRs:

- Music Blocks – PR #4873 [View PR](#) 
- Sugar Labs Website (www-v2) – PR #655 [View PR](#) 
- Sugar Labs Website (www-v2) – PR #621 [View PR](#)
